Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary

Application No.

10/791,650

Applicant(s)

OZAKI ET AL.

Examiner

Mohammad M. Ali

Art Unit

3744

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 March 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-10 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 02 March 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Stolberg (EP 0889244 A2). Stolberg discloses an ejector comprising a nozzle 2 including a fluid outlet port from which high-speed fluid is jetted, and a nozzle tapered section 4 located at an upstream side of the fluid outlet port, wherein the nozzle tapered section has an inner passage with radial dimension reduced toward the fluid outlet port; and a needle 8 having a needle tapered section disposed in the inner passage, wherein: the needle 8 tapered section has a cross sectional area reduced toward a downstream end of the needle 8; the downstream end of the needle is positioned at a downstream side with respect to the fluid outlet port at the end of the nozzle tapered section 4; and the nozzle tapered section 4 has a taper angle which is equal to or larger than a taper angle of the needle tapered section 4; the nozzle further includes a straight section extending from the fluid outlet port to an upstream side by a predetermined distance; the straight section has an inner radial dimension that is substantially constant; the straight section is arranged at a direct downstream side of the nozzle tapered section; the needle is disposed in the nozzle to define a fluid passage therebetween; the needle 8 tapered section includes a root section and end section downstream of the root section; and the end section has a tapered angle that is

Art Unit: 3744

different from a taper angle of the root section; the taper angle of end section is smaller than the taper angle of the root section; the ejector further comprises an actuator (knurled portion) for displacing the needle 8 in an axial direction of the needle 8 and a mixing portion. See Fig. 1-2, column 3, line 25 to column 5, line 30.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 5, 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stolberg in view of Takeuchi et al., (6,550,265). Stolberg discloses the invention substantially as claimed as stated above except flat end surface needle, a compressor a radiator, a gas-liquid separator. Takeuchi et al., teach the use of a flat end surface needle, a compressor 100, a radiator 200 and a gas-liquid separator 500 in an ejector cycle system for the purpose of sucking evaporated refrigerant at a lower pressure side and increasing the pressure of the refrigerant to be sucked into a compressor. See Fig. 1. Therefore, it would have been obvious to one having ordinary skill in the art at the

Art Unit: 3744

time the invention was made to modify the ejector of Stolberg in view of Takuchi et al., such that a flat surface end needle, a compressor, a radiator and a gas-liquid separator could be provided in order to in order to feed the compressor with refrigerant with increased pressure.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl J. Tyler can be reached on 571-272-4808. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
